

## Bow Maker Instructions

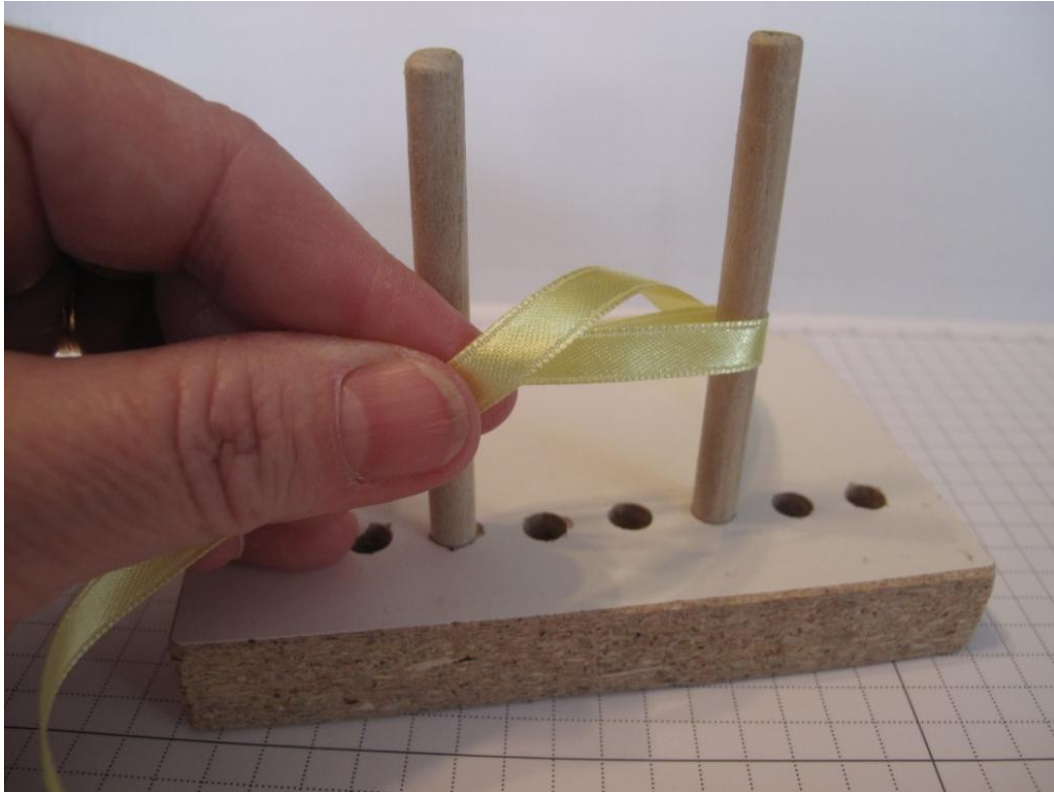

Holding one end in your left hand, wrap other end of ribbon around from front to back ...

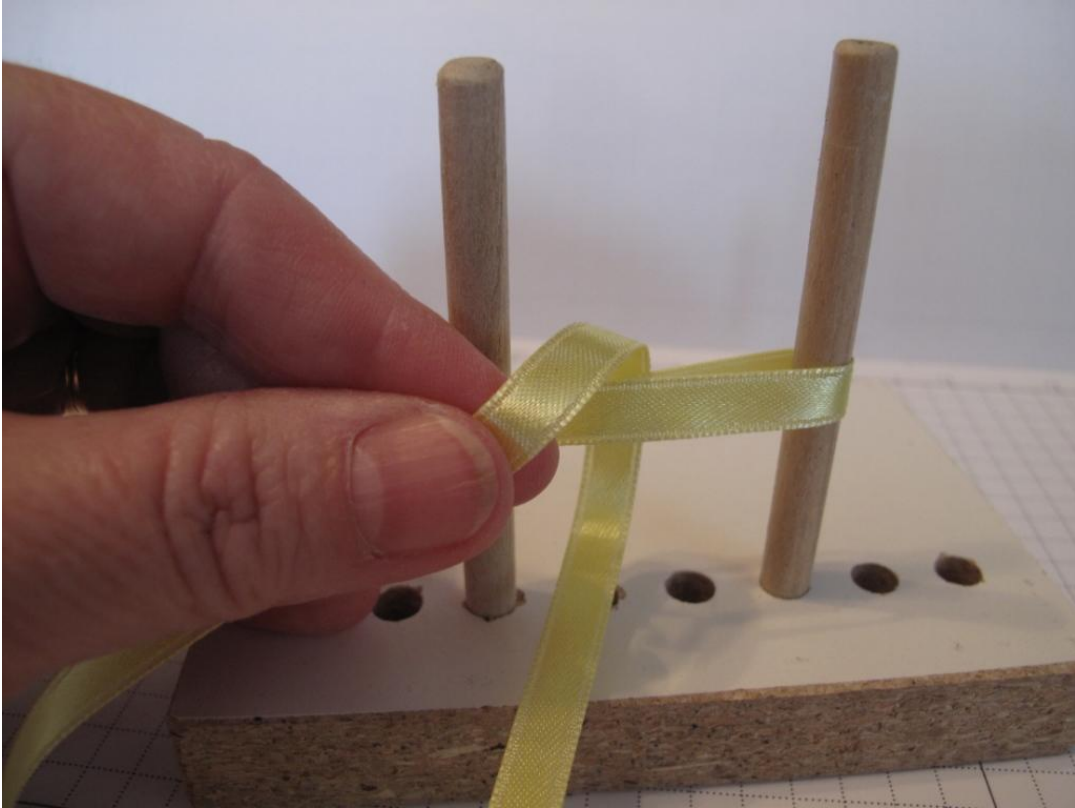

And around to the front under your fingers to the left ....

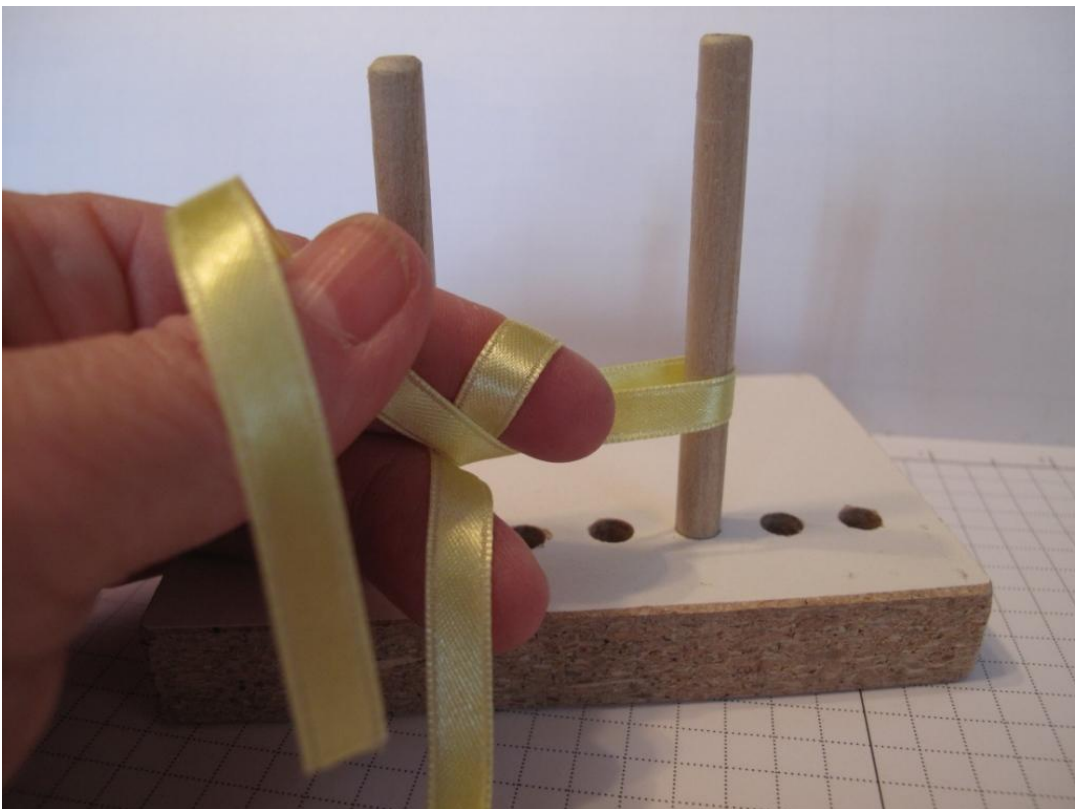

Hold ribbon between pointer finger and thumb, then wrap ribbon up and through posts over both of the ribbon pieces ...

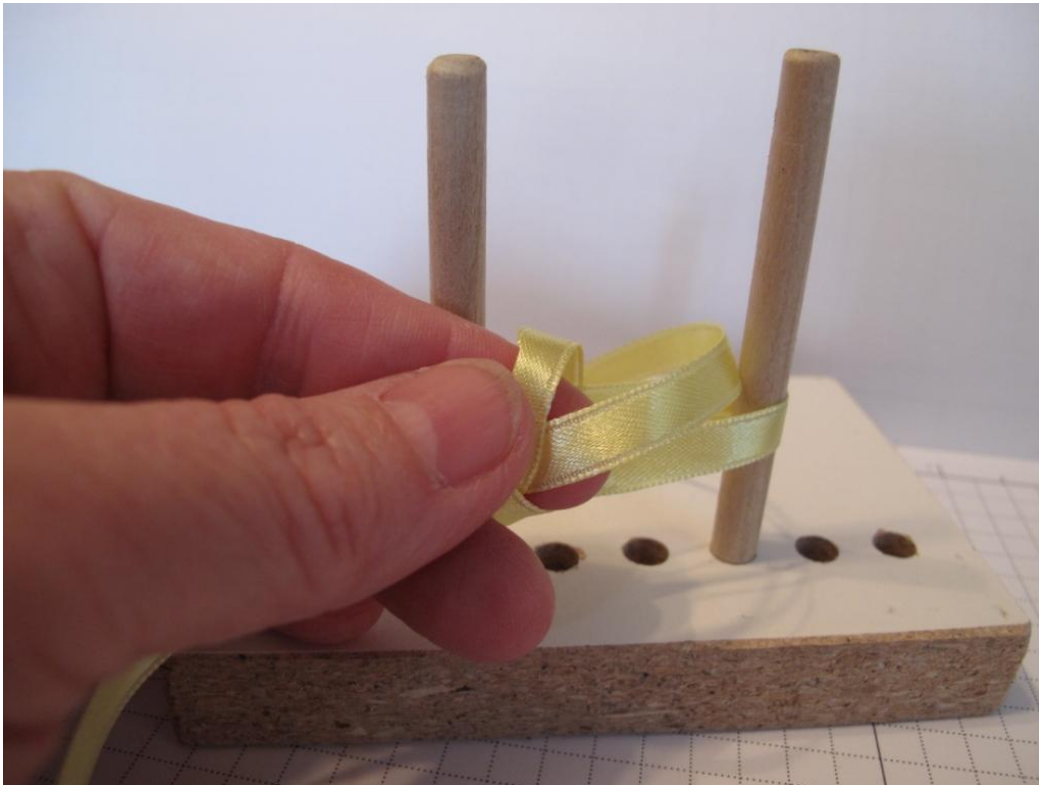

Wrap the ribbon around the two pieces and bring it to the front ...

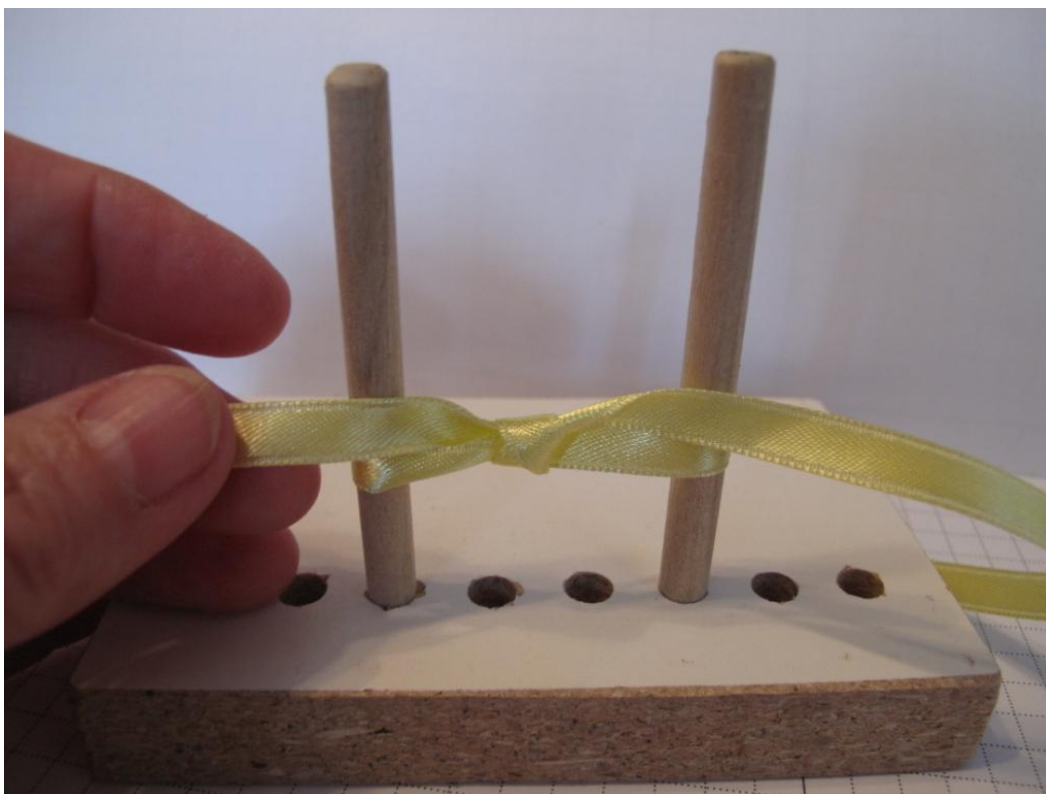

Then bring it up to the left leaving pointer finger inside the loop that is formed ....

Thread the ribbon end through the loop that is formed (where your pointer finger is) in the direction the pointer finger is pointing ...

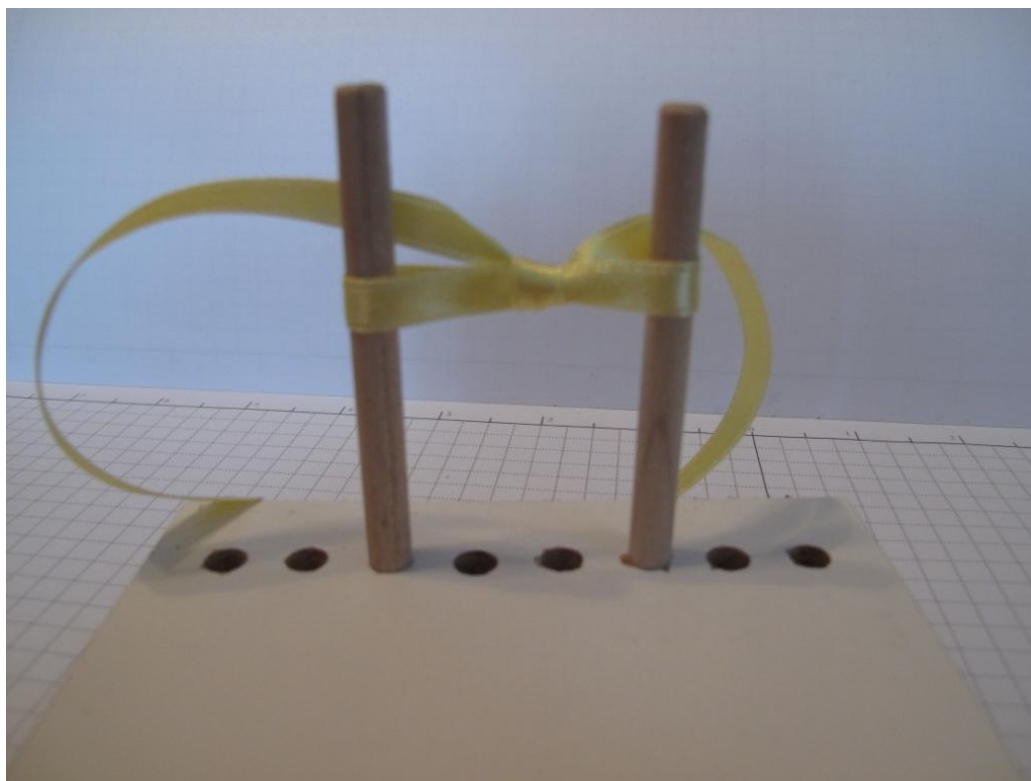

Pull ends to tighten bow. If you want an "inline" bow, pull ends sideways ....

If you want the ends to hang down from the bow, pull them upwards. You are looking at the back of the bow ...

Here is the bow from the front .....

A perfect bow every time!
