

Petite Box

Finished box 2-3/4 x 2 x 2

Card stock 7 x 10

Scoring

___With the 7 edge across the top of the trimmer, use the scoring tool to score all the way down the paper at

1/2 2-1/2 4-1/2 6-1/2

___With the 10 edge across the top of the trimmer, use the scoring tool to score all the way down the paper at

3/4 3-3/8 5-3/8 8

Scoring is complete

Cutting (scissors)

___With the 10 edge across the top, cut all vertical score lines above and below the center row; do not cut into center row at any point. There are eight cuts in all.

___With the 7 edge and 3/4 row across the top, cut away unneeded sections following the *Petite Box Cut Map*. Cut the four 1/2-cut squares and mitered areas last. Reminder: Apart from the 3/4 row across the top, all rows will have three sections remaining after unneeded sections are removed.

___For the four 1/2-cut squares, cut approximately one-inch outward from the center column score lines.

___The mitered flaps are the top and bottom flaps of the box. Trim the score lines, to the center column, ever-so-slightly. Then, miter each side flap section only. Keep miter cuts to a minimum to ensure a snug fit. Burnish all remaining score lines. Assemble box without adhesive. Check miter cuts for fit. Adjust as needed.

___Unfold box. Add adhesive to the side flap, checking for right side.

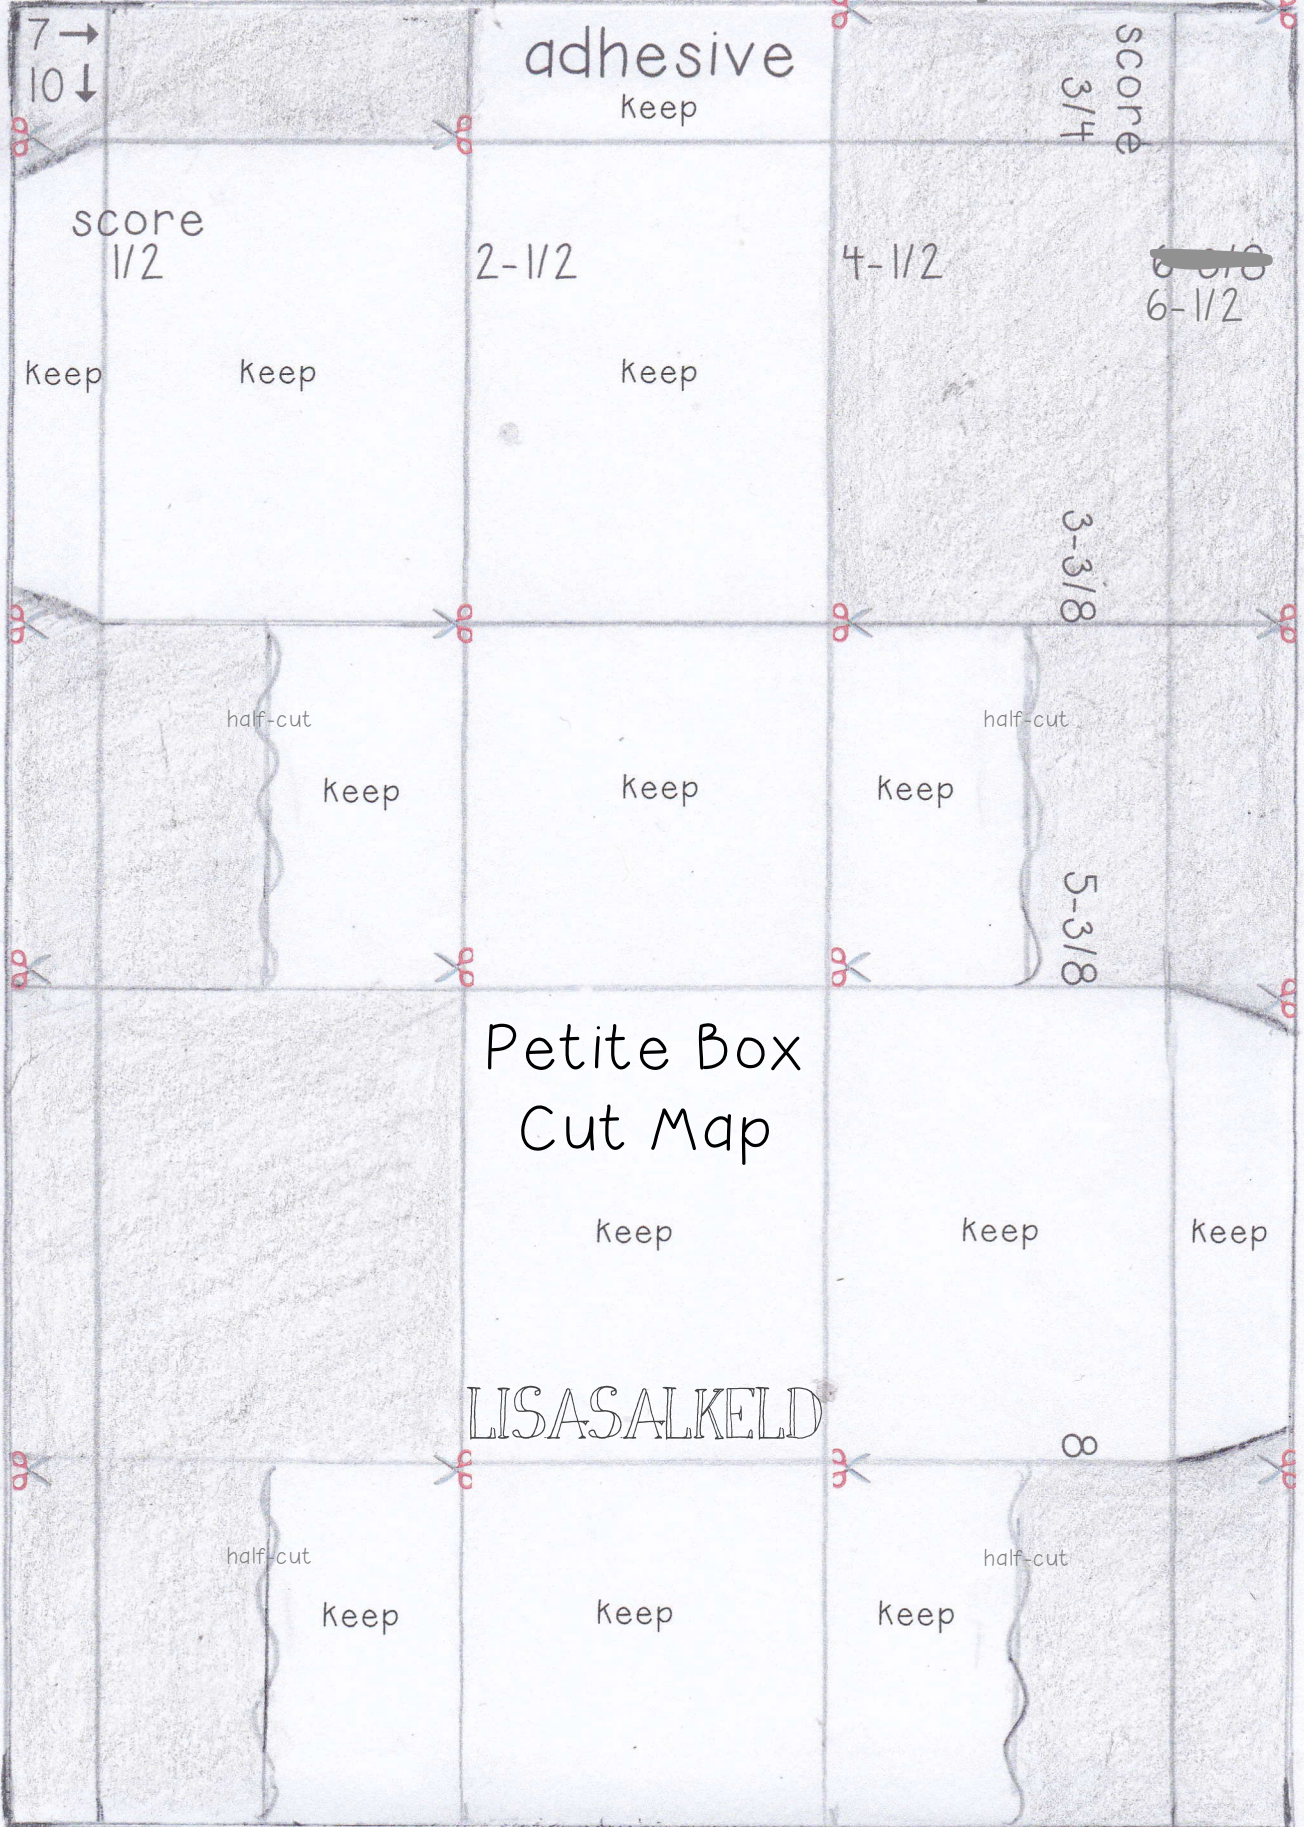

___Assemble and embellish. Petite box is complete.

___Belly band 11 x 1-3/4 and, if desired, score at 2-1/4 4-1/4 7 9

For best fit, wrap around box and secure at the back without pre-scoring
