

Meerkat Treat Holder

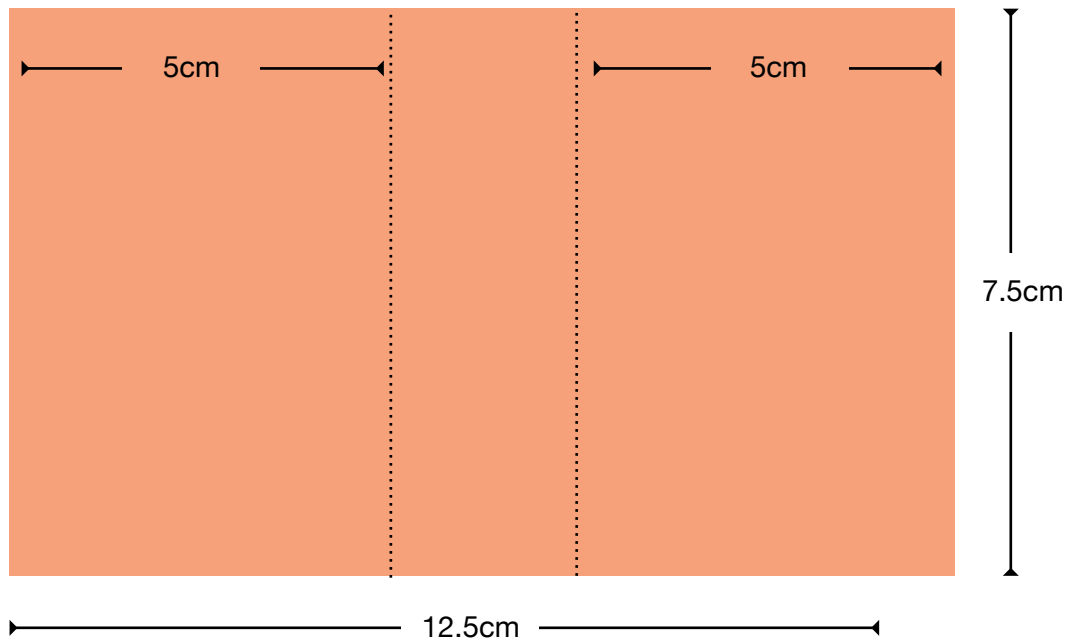

- Coastal Cabana: 11.5cm x 9.5cm. Score at 2.5cm all round. Add tape where shown.
- Grapefruit Grove: 12.5cm x 7.5cm, scored at 5cm from each end.
- Belly band (Coastal Cabana): 14.5cm x 3.8cm
- DSP for the front: 4.5cm x 7cm
- Contrasting DSP belly band: 14.cm x 2.5cm
- DSP for Love Hearts: 7cm x 3cm (three pieces)
- Whisper White scraps
- Ribbon

1. To make the tray, take the Coastal Cabana piece, scored all the way round at 2.5cm (dotted lines) and cut where the lines are solid. Assemble into a tray, with the tape on the underside.

2. Take your Grapefruit Grove piece to make the jacket. This is scored at 5cm from either end, as shown here. Fold to make a “book jacket” and attach your largest piece of DSP to the front.

3. Now you can attach the Coastal Cabana tray to the inside of the jacket, butting it up to the spine as closely as you can.
4. Take your three strips of DSP and wrap them around the Love Hearts. Don't hold back on the tape!
5. To make the belly band, take the strip of Coastal Cabana cardstock and score at 6cm from each end. Don't score the DSP.
6. Take this strip and the matching DSP and punch both pieces at both ends using the Delightful Tag Topper Punch. *If you are not using a punch, you can reduce the length of these strips by 0.5cm.*
7. Attach the DSP strip to the Coastal Cabana strip and gently fold it around the treat holder. Adding the treats first will give it more stability.
8. Tie the two ends together using ribbon and then decorate as desired.

This project was inspired by [Mary Fish's Nugget Holder](#) which, in turn was inspired by [Kadie Labadie's Tic Tac holder](#). Can we keep this going? Maybe you're inspired to make your own holder to fit your favourite treats?
